

**New Hampshire Department of Health and Human Services
Patient Identification Bracelets and Software System**

ADDENDUM #3

**RFP-2019-NHH 03-PATIE
Patient Identification Bracelets and Software System**

On December 13, 2018, the New Hampshire Department of Health and Human Services published a Request for Proposals soliciting proposals for the provision of a patient identification system for New Hampshire Hospital (NHH). The Department is soliciting proposals from qualified vendors to provide a system for producing wristbands that will be worn by patients.

The Department is publishing this addendum to:

Delete and replace Section 3, Scope of Services,, Subsection 3.3.1, with the following:

- 3.3.1. The selected Vendor will install the patient identification system and have it in a fully functional state no later than sixty (60) days after the Contract Effective Date. Installation must include, but may not be limited to:
- 3.3.1.1 Determining and documenting configuration for deployment.
 - 3.3.1.2. On site installation of software application at facility.
 - 3.3.1.3. Integrating patient identification software with current system.
 - 3.3.1.4. Testing of configuration.
 - 3.3.1.5. Training staff to use the system.
 - 3.3.1.6. Testing of support services.
 - 3.3.1.7. An initial supply of consumable items that can produce no less than five hundred individual patient identification bracelets.
